

SECTION 1: BUILDING DESCRIPTION

MEZZANINES

A. Maimaar standard mezzanine:

Supply normally includes support **columns**, primary **beams**, secondary **joists** and a **0.7mm galvanized steel deck** that supports a **reinforced** concrete slab (slab by others). The steel deck acts as a shuttering that carries the weight of the slab during construction only. The concrete slab must contain steel reinforcements and must be designed by a structural engineer to support all the applied loads on the mezzanine. Please refer to Maimaar's "**MEZZANINES**" brochure for more details of standard Mezzanine.

B. 6mm Checkered Plates as Deck

Supply includes 3mm checkered plates and no additional concrete / screeding is required.
